

Ocean Habitat Units

Attention Royal Pelican Dock Owners and Non-Dock Owners! Royal Pelican Boating Association offers \$25 towards price per each unit purchased by a Royal Pelican Resident retroactive to RP owner already committed or purchased

Units:

- Mimic Mangrove Habitat that will harbor crabs, mussels, oysters, sea squirts and 150 different species to clean water. Returns natural function to seawalls bringing coastal canals/seawalls to life lost to shoreline construction. Perfect environment for aquaculture.
- Each unit cleans 25,000 to 35,000 gallons of water per day, including red tide and algae. Therefore, they also clean air.
- Each unit increases fish population 200 to 300 fish per year, 50 different types of fish have been spotted around installed units along with blue and stone crab
- Unit structure is made up of polypropylene, tubing, and rope of high-density plastic that stands up to marine environment. No maintenance nor electric needed. Units attached with flexible collar to float with tides to pilings (no harm to pilings). 10 minutes to install.
- Units Dimensions 2' wide, 3' long, 2' tall. Space required below finger/dock decking minimum 28" wide with 40" between pilings.

Per Unit Pricing - \$175 per unit w 50+ units sold (additionally 55% of price eligible for Federal tax deduction, speak w accountant, possibly amount to \$20 to \$50 on return).
